SERVE GLOBAL & ITS MISSION

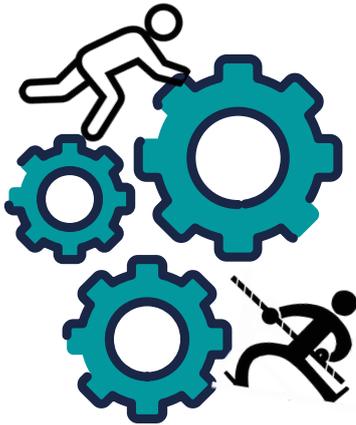

Serve Global is a non-profit organization that promotes holistic social service activism approach globally in partnership with individuals, communities, and institutions. Our mission is to create an engaged generation dedicated to serving communities to see a better world, free from chronic social problems. One of the organization's goals is to alleviate the street children problem by working on the **root cause** and always strive to understand the society, foster empathy, self-efficacy, and personal esteem to overcome it.

THE EXTREME PREVALENCE OF CHILD STREETISM IN ADDIS ABABA

There has been an increase in the rate of children living in the streets in the country of Ethiopia, distinctively in Addis Ababa. Studies have shown that the major cause of this problem is the poverty and the family's inability to provide relevant care and support. While some of the street children are just mainly living on the streets, others are working on the street to survive. This could lead to a more serious dilemma affecting not just their welfare, but also the betterment of the community they're in. Risks confined in that situation include a surge of violence, indulgence to prohibited drugs and sexual activities, school drop-outs, an easy target for sex offenders, and unwanted pregnancy.

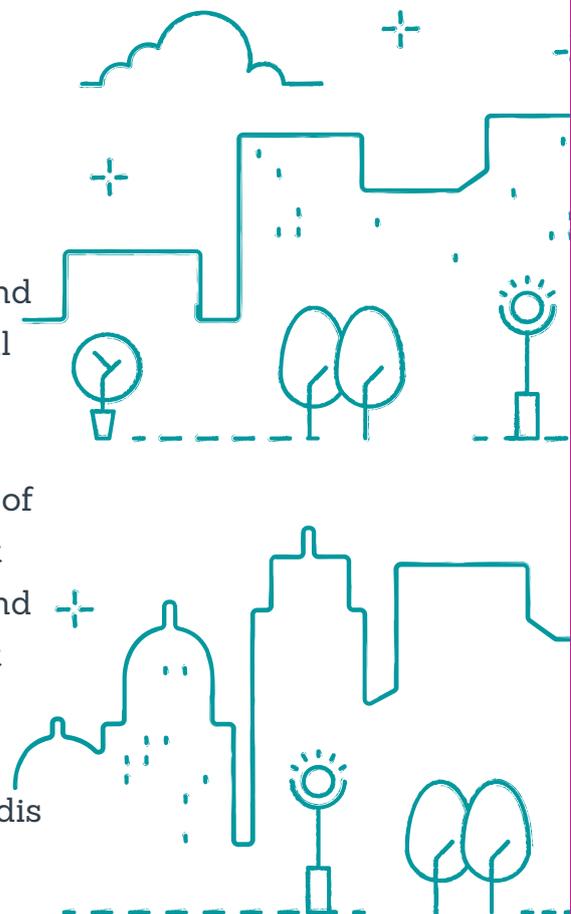

OUR APPROACH TO ADDRESS THE PROBLEM

Serve Global believes that to address these problems, the root cause must be dealt with appropriately- identifying the push and pull factor behind it, and responding with fitting solutions and suitable aid. Serve Global's project on Reintegration and Community- based Psycho-Social Rehabilitation of Street Children makes provision for strategies, activities, and a new approach in bringing quality service. In addition, various awareness campaigns for the beneficiaries specifically the homeless or street children from Addis Ababa city.

OUR TAILORED & INTUITIVE SOLUTION

Our services entails establishing a restoration home or center that can accommodate kids and the management team for various recreational games, activities, and training programs. Reintegration of the street children to their respective families, granted if the assessment of the said family is in support of the child's best interest and safety, providing psycho-social and economic empowerment services for 50 street working children (children at risk) and their families, and conducting Community-based awareness activities for 2000 members of Addis Ababa: Arada Sub-city.

OUR PIONEER AND MODEL PROJECT ENVISIONED

This two-year project aims to reduce the vulnerability of children to street life, Arada Sub-city; Addis Ababa

The plan intends to protect 80 “of these street children” and 50 “working street children” from their difficulties and vulnerabilities. A due process will be conducted and criteria will be set in choosing a total of 130 eligible beneficiaries. Alongside is close monitoring of the project’s performance using feasible and applicable data systems and timely reporting of updates. This will be made to ensure the effective implementation of the said project.

THE ANTICIPATED OUTCOME OF THE PROJECT

Serve Global is going to raise the funds necessary to run the two-year-long project, along with the help of Serve Global Supporters and Philanthropist from USA as the main donors, with a total of 3,286,820.00 Eth Birr (91,300 USD).

This will include the direct project consisting of reintegration costs, educational materials, and other resources. In addition, household support items, food, clothes, utility expenses such as cleaning, medical expenses, business set up activities, and training costs.

**91,300.00
USD**

TOTAL COST

Allocated budget targeting the project's direct beneficiaries and community members of Addis Ababa (Arada Sub-City).

SERVE GLOBAL INTENDS TO EXERT RELENTLESS EFFORTS AND ITS RESOURCES THAT ARE AVAILABLE AT ITS DISPOSAL.

Serve Global will involve governmental agencies, NGOs, private entities, and volunteers to achieve the desired results. Serve Global believes that by the end of this project, a major change in the lives of the chosen children and a significant decline in the rate of the street children in Addis Ababa will be achieved.

100%

Thus, this can be achieved if and only if other institutions come together, and work along in similar projects that would come up with a better harmony in determining the outcome of such tailored projects.
